REEL FOLDER

44 reels · 10 seconds each

Each reel has the idea, a ready-to-paste Google Flow prompt, the on-screen text to add afterwards, the sound mood and the caption. Reels 1–33 run daily from 30 Nov to 1 Jan; 34–44 are for after launch.

How to make each reel

1 · Generate

In Google Flow choose text-to-video (or frames-to-video when the prompt says to attach the icon). Set 9:16 vertical. Paste the prompt exactly. Make 2–3 versions and keep the best.

2 · Add the text

Video AI often misspells words, so every prompt says "no text". Add the on-screen text in CapCut or Instagram's editor using Poppins Bold, white or yellow, with the timings listed.

3 · Add sound

Pick a trending sound from Instagram's audio library that matches the mood listed. Keep it under the reel's 10 seconds.

4 · Post

Post at the time listed, add the caption and hashtags from page 1, share to stories, TikTok and YouTube Shorts.
