AFTER LAUNCH

Grow → Creators → Restaurants

Months 1–6: build the habit and the audience. From month 6 (July 2027): bring in creators. From year 1 (January 2028): sign up restaurants and cafés. Image posts 34–44 and reels 34–44 belong to this page.

Stage 5 · Grow (January – June 2027)

Weekly rhythm

Day	Post	Time (UAE)
Monday	Tip or feature image (how to save, map, categories)	12:30 pm
Wednesday	Spot of the Week — image 35 + reel 35	12:30 pm / 8:00 pm
Friday	Feature or "problem" reel (re-use reels 2, 4, 9, 13, 18 with new footage)	8:00 pm
Saturday	Save-worthy Saturday — image 36 + reel 36	11:00 am / 7:00 pm
Sunday	Community repost: a follower's saved place (place photo only) or a poll	11:00 am
Every day	2–3 stories: polls, question box, reshares, "saved this week" lists	9:00 am and 6:00 pm

Monthly themes

January
New year, new places. Thank-you post (34), onboarding tips, "first place you saved" stories.

February – March
Ramadan (expected to start around 8 Feb 2027): iftar and suhoor spots (37). **Eid al-Fitr** (around 10 Mar): Eid outings (38). Dates depend on the moon sighting.

April
Spring outdoors: parks, beaches, outdoor cafés before the heat.

May
Eid al-Adha (expected mid-May 2027): family days out. Start "best indoor spots" lists.

June
Summer indoor season (39): malls, play zones, indoor cafés. Prepare the creator programme.

Ways to grow without paid ads

- Ask every new user to share their first saved list to stories and tag you; repost the best (places only, no faces).
- Reply to comments with reels ("you asked where this is — saved it for you").
- Collaborate with UAE place pages and café pages (not personal creators yet) using Instagram Collab posts.
- Post every reel on TikTok and YouTube Shorts too.
- Prompt happy users for App Store and Google Play reviews after their third saved place.

Numbers to check every Sunday

Number	Where to find it	Why it matters
Installs	App Store Connect / Google Play Console	Growth of the app itself
Weekly active users	Your app analytics	Whether people keep using it
Places saved per user	Your app analytics	The habit you're building
Saves and shares per post	Instagram Insights	Which content to make more of
Link-in-bio taps	Instagram Insights	How well posts turn into downloads

Your earlier milestone: around 2,000 installs and 250–500 weekly users is the point to start talking to restaurants — even if that comes before January 2028.

Stage 6 · Creators — "Spotted Insiders" (from July 2027)

Who

UAE food, café, shopping and things-to-do creators. Start with smaller accounts (roughly 1,000–50,000 followers): they reply, cost less and their followers trust them.

How to find them

Search #DubaiFood, #AbuDhabiFood, #UAEcafes, #HiddenGemsUAE. Shortlist creators whose posts are mostly places — perfect fit for saving.

What you offer

Early access to new features, a feature on your page (image 41), and later a paid or per-download deal once you have budget.

The brief

Show a place they love, then show it being saved in Spotted (screen recording) and mention the nearby nudge. They choose how they appear in their own content; your brand graphics stay free of faces and human features.

Deliverables

1 reel + 3 stories + a public list in Spotted ("[Creator]'s top 5"). You repost with image 41 and reel 41.

Tracking & rules

Give each creator their own download link to count installs. Check the UAE Media Council's current rules on paid promotion — paid posts must be clearly labelled, and creators may need an advertiser permit.

DM template

```
Hi [Name]! We love your posts about [place/area]. We're Spotted — a UAE-made app that saves places from Instagram reels and reminds you when you're nearby. We're starting a small group of Spotted Insiders and you'd be perfect. Would you like early access and a feature on our page? Happy to share more. — [Your name], Spotted
```

Stage 7 · Restaurants & cafés (from January 2028)

Who to approach first

The places your users save most. Your app data shows you exactly who they are — start with those.

What they get

Their offer shown to people who already saved them, a nudge when those people are nearby, and a spot in the in-app Offers and coupons feed.

The pitch in one line

"[X] Spotted users have saved your café. Let's remind them to come in."

Pricing

[Your monthly price] — consider a free first month for the first 20 partners to build case studies.

Instagram support

Image 42 + reel 42 to recruit partners, image 44 + reel 44 when offers go live, monthly "partner of the month" posts.

Later

The Spotted stamp card and Spotted Passport from your roadmap — tease them on Instagram a month before they launch.

Restaurant DM / email template

```
Hi [Restaurant name] team! [X] people have saved [Restaurant] on Spotted — a UAE app that saves places from Instagram reels and reminds people when they're nearby. We'd love to help you turn those saves into visits with an offer we show them when they're close by. Can we send you a one-page overview? — [Your name], Spotted · [email] · [@yourhandle]
```

Year at a glance

When	Focus	Posts on page 2/3
30 Nov – 31 Dec 2026	Tease, reveal, countdown	Images & reels 1–32
1 Jan 2027	Launch	Image & reel 33
Jan – Jun 2027	Grow: weekly series, Ramadan, Eid, summer	34–39
From Jul 2027	Creators — Spotted Insiders	40–41
From Jan 2028	Restaurants, offers, one-year birthday	42–44
