Spotted · Developer Handoff (v1)

Covers 5 core screens. Mobile-first (iPhone/Android, 375–430pt wide). Build in Expo / React Native. Use the **tokens** below, not raw values.

Design tokens

Token	Value	Use
color-primary	#6A1FB0	Buttons, active tab, links
color-primary-dark	#3C096C	Headings, dark backgrounds
color-accent	#E5383B	Map pins, Save button, alerts
color-soft	#C9A2FF	Chips, rings, borders
color-star-save / -visit	#FFC93C / #2BB673	Yellow star = save, green star = visit, success
font	Poppins	title 24/Bold · heading 18/SemiBold · body 15/Regular · caption 12/Regular
space-xs/sm/md/lg/xl	4 / 8 / 16 / 24 / 32	Screen side padding = md
radius-sm/md/lg	8 / 16 / 24	Chips / cards / sheets
tap-min	44 × 44	Every tappable thing
motion-fast/base	150ms / 250ms, ease-out	Taps / sheets & page changes

Rules: bottom tab bar (Home · Map · Creators · Profile). Dark mode supported. Visuals: no people, faces, eyes or hands; use places, food, pins, icons.

1. Home – saved places

Part	Spec
Layout	Title "Your spots" · search bar · filter chips (All, Food, Café, Shops, Near me) · vertical list of place cards
Place card	Photo 72×72 radius-md · name (heading, 1 line, …) · area + distance (caption) · offer chip if active · yellow/green star count
Tap / long-press / swipe	Open place · menu (Share, Remove) · swipe left = Remove with Undo toast 4s
Empty	Pin icon + "Nothing saved yet. Share a reel to Spotted to save a place." + button "How to save"
Loading / error	3 grey skeleton cards · "Couldn't load. Pull to retry."

2. Map – nearby reminders

Part	Spec
Layout	Full-screen map · red pins for saved places · "Recenter" button bottom-right · bottom sheet (peek 120pt) listing places in view
Pin tap	Pin grows 1.2× (motion-fast), sheet shows that place with Directions + Coupon
Reminder	Push when within ~300m: "You're near [Place], which you saved!" Max 1 per place per day, none 11pm–8am
Permission	Explain screen BEFORE asking for location: why + "Allow" / "Not now". If denied: banner "Turn on location to get reminders" → Settings
Many pins	Cluster into a purple circle with count above 20 pins

3. Save from Instagram (share sheet)

Part	Spec
Flow	User taps Share on a reel → Spotted → sheet opens with reel thumbnail and the detected place
Found place	Name + area, button "Save spot" (color-accent, full width). Success: tick + "Saved!" then auto-close after 1.2s
Not found	"We couldn't find the place" + search box to pick it manually
Already saved	"Already in your spots" + "Open"
Offline	Save the link locally, sync later; show "Saved, will update when online"

4. Business offer & coupon

Part	Spec
Layout	Place photo header · offer title (max 40 chars) · conditions (max 120) · expiry date · big QR code on white card · "Show this at the counter"
Scan	Business scans QR in the partner app → customer sees green tick + "Visit counted ★" and gets a green star
States	Active · Used (greyed, "Used on [date]") · Expired (greyed) · No offer ("No offer right now")
Screen	Raise brightness to max while QR is shown; keep screen awake

5. Creator page

Part	Spec

Layout	Creator avatar (logo or initials, no face required) · name · counts: places, ★ saves, ★ visits · button "Save all [N] places" · list of place cards
Save all	Saves every place in one tap; button turns into "Saved ✓"; toast "[N] places added"
Web link	Same page opens on the website from the bio link; if the app isn't installed, show "Get Spotted" store buttons
Empty	"This creator hasn't added places yet."

Accessibility (all screens)

Every icon button has a label (e.g. "Save spot", "Recenter map"). Text supports bigger system font sizes. Contrast 4.5:1 minimum: white text only on #6A1FB0 or darker. Focus order goes from top to bottom. Stars show a number too, not just colour. Reduce Motion setting turns off pin bounce and confetti.

Coming soon (don't build in v1): WhatsApp updates, Ramadan mode, reels search.
