Spotted: New Ideas Build Steps

App + website · step by step, like you're 5 · 31 Oct 2026 · Use together with "Spotted_App_Whats_Left.pdf"

How to use this: open **claude.ai/code**, choose the right repository (**Spotted** for the app, **Spotted-website** for the site), paste **one prompt**, check it on your phone, then say **"commit this step"**. One step at a time. **Launch-day steps first**. The later ones are built but switched OFF in **src/config/features.ts**.

The plan on one page

When	What users get
1 Jan 2027 (launch)	New Home (search + paste bar, closest circles, newly saved list) · Map with pin intro · Saved tab with countries + expiring offers · Profile with "Places you've been" · 120 no-face avatars · passive offer reminders · **Spotted Together tab says "Coming soon"**
~June 2027	**Spotted Together**: groups, polls, notes, invite by WhatsApp link (needs real accounts, email code login)
Jul 2027	**Insiders**: paid influencers (AED 249/month) get a profile picture, all reels shown, stars
Jan 2028	**New** tab with puzzle tiles (Insiders · Partners · Spotted Offers · Spotted Select coming soon) · partner pages turn purple · menu, stars, reviews, Pins
~2030	**Spotted Select** membership

The rule book (Step 1 saves it into your app)

Topic	Decision
Bottom bar	Home · Spotted Together · **Map (raised pin, centre)** · Saved · Profile. "New" replaces Together's spot in Jan 2028 and Together moves to the top of New
Home top	Avatar (left) · "Spotted" · **no ☰ menu** (everything is in Profile)
Search bar	Searches anything. If a link is pasted, the app reads the reel's caption, guesses the place, the user **confirms with one tap**, then picks a collection (Desserts, Cafés…). Instagram + TikTok. Share → Spotted works without leaving Instagram
Closest circles	Max 10. **Red ring = saved**, **purple ring = partner** (max 3 of 10, from 2028). Saved partner = red + purple dot. **Under 1 km pulses**
Below circles	**Newly saved** places (any distance)
Avatars	No photos or uploads. Pick from **~120 free icons** (fruit, food, drinks, vehicles, nature, sports, things, places). **No animals, faces or hands.** No emoji characters (use an image icon set)
Saved tab	Collections/All switch (left) · country button (**only if saves in 2+ countries**) · top: **expiring/expired offers** with × → "Delete place or keep it?". Expired stays until the user decides

Offers	Read from the reel caption (dates + hours), user confirms. Stored **per branch** (KFC Jumeirah ≠ KFC Downtown) with **which reel** it came from. "Ends in 2 days" red label. "Offer live now!" in nearby alerts only during offer hours. Offers stay **private to the user** until the place partners
Reminders	Nearby alerts = normal notification. Offer expiry = **passive (silent) notification**, max 1 a day at 6 pm, on/off in Profile. No WhatsApp
Place page (not partner)	Only reels **this user saved**. Letters circle ("KF") + category icon. **No photo, logo, menu, stars, reviews or other influencers**
Place page (partner)	Turns **purple**. Insider reels, menu, stars (public only at 100+), reviews, offers. Non-Insider reels: still only the saver sees them
Influencer rows	Reel icon opens **the exact reel**. Max **9 items**. Dishes/prices from the caption if present (user can edit). **Newest price** shown, "price from @handle, Dec 2026". No follower counts until Insider
Insider	**Paid only, AED 249/month.** No free Insider. Only Insiders get a profile picture. Non-paying influencers get the "Saved from @handle" credit only
Map	Opening: pin glides to the centre, "Spotted" appears, map opens. Red bookmark = saved · purple bookmark = saved partner · purple pin = unsaved partner. Category icon inside. Filter top-right. Max 20 purple pins **around the area you're looking at**, clusters when zoomed out; saved bookmarks always shown
Profile	Settings, Help (WhatsApp), About, Privacy · **"Places you've been"** (tap "I went") · later: Pins per place, money saved, offers used · email change by **free email code** (phone/WhatsApp codes later)
Spotted Together	Groups + one-to-one in one list, max **45** per group, invite by **WhatsApp link**, friends need the app. **No chat.** Polls: date/day, leave time, (outdoor only) bring an item or order there + tick list, overnight yes/no; or vote between places (shows stars + influencer count). **One note per person.** Anyone can make a poll, it closes at a set time, the creator breaks a tie. "4 updates" badge. Leave / creator removes
Pins	1 Pin per AED 15 spent, leftover carries over. Spend only on Spotted Select deals

APP · Step 1 · Save the rule book

COPY INTO CLAUDE CODE

Read SPEC.md and CLAUDE.md. I'm attaching (or pasting) the rule book table from my PDF "Spotted_New_Ideas_Build_Steps". Add it to SPEC.md as a new section "Decisions 31 Oct 2026", grouped by Launch (1 Jan 2027), June 2027, Jul 2027, Jan 2028. Mark everything after launch as "build behind a features switch, OFF". Don't write app code yet. Show me what you changed and commit.

How to attach: in Claude Code, click the **paperclip** and choose this PDF, or copy the table and paste it.

APP · Step 2 · Features switch file

COPY INTO CLAUDE CODE

Create src/config/features.ts with true/false switches: together, newTab, partners, insiders, offersFromPartners, pins, select, menu, stars, reviews. Set them all to false. Every later step must check its switch so I can turn things on later without new code. Run npm run check and commit.

APP · Step 3 · New bottom bar

COPY INTO CLAUDE CODE

Change the bottom tab bar to: Home · Spotted Together · Map (a raised location pin in the centre) · Saved · Profile. Spotted Together shows a friendly "Coming soon" screen while features.together is false. When features.newTab is true later, the tab becomes "New" and Spotted Together moves to the top of it. Keep the bounce + sliding dot animation. Commit.

✓ **Five tabs, Map in the middle as a raised pin, Together says "Coming soon".**

APP · Step 4 · New Home

COPY INTO CLAUDE CODE

Rebuild Home from top to bottom:
1. Top row: the user's avatar on the left (opens Spotted Together), "Spotted" in the middle, nothing on the right (remove the menu icon).
2. One bar that searches everything (saved places, places nearby, influencers). If the text is an Instagram or TikTok link, read the shared caption (never scrape), guess the place, show "Is this the place?" for one-tap confirm, then ask "Which collection?" (Desserts, Cafes, etc. plus "New collection"), then save.
3. "Closest places": max 10 circles of saved places, nearest first, distance under each. Red ring = saved. Under 1 km: gentle pulse/glow. (Purple partner rings later: max 3 of 10, saved partner = red ring + purple dot, behind features.partners.)
4. Below: "Newly saved" list, newest first, any distance.
Respect Reduce Motion. Commit.

APP · Step 5 · Avatars (no faces)

COPY INTO CLAUDE CODE

Add avatar picking: about 120 icons from a free licence icon set that allows app use (for example Microsoft Fluent Emoji, MIT), saved as image files, NOT emoji text characters. Groups: Fruit, Food, Drinks, Vehicles, Nature, Sports, Things, Places. Exclude anything with faces, eyes, hands, people or animals. No photo upload. Show the picker in onboarding and Profile. Add a test that the avatar list has no face/animal items by name. Commit.

APP · Step 6 · Saved tab

COPY INTO CLAUDE CODE

Update the Saved tab:
- Left of the search bar: a Collections / All switch.
- Right: a country button that appears ONLY if the user has saves in 2 or more countries; default = the country they're in now.
- At the top: "Offers ending soon / ended". Each offer belongs to one branch and shows which reel it came from. Red "Ends in 2 days" label (3 days before). Ended offers stay with a small X until the user taps it; then ask "Delete this place, or keep it saved?".
- Offers come from the reel caption (dates and hours), confirmed by the user when saving.
Commit.

APP · Step 7 · Reminders

COPY INTO CLAUDE CODE

Nearby alerts stay normal notifications. When a saved offer is live right now (inside its hours), the alert says "Offer live now!". Add offer-expiry reminders as PASSIVE notifications (no sound, no pop-up: iOS interruption level passive, Android low-importance channel), at most one summary a day at 6 pm, e.g. "2 saved offers end soon". Add an "Offer reminders" on/off switch in Profile. Commit and tell me how to test it.

APP · Step 8 · Place page + influencer rows

COPY INTO CLAUDE CODE

Update the Place page:
- Not a partner: letters circle (e.g. "KF") + Eat/Shop/Play icon, no photo or logo, no menu button, no stars/reviews, and only the reels THIS user saved.
- Influencer rows: initial circle (no profile picture unless Insider), no follower counts unless Insider, max 9 dishes, dishes/prices read from the caption if present (user can edit), newest price shown with "price from @handle, month year". The Instagram/TikTok icon opens that exact reel.
- Partner (behind features.partners): the page turns purple and shows Insider reels, menu, offers, reviews, and stars only when 100+.
Commit.

APP · Step 9 · Map

COPY INTO CLAUDE CODE

Update the Map tab:
- Opening: the location pin glides to the centre, "Spotted" appears under it, then the map opens (fade only if Reduce Motion).
- Markers with the Eat/Shop/Play icon inside: red bookmark = saved; purple bookmark = saved partner; purple pin = unsaved partner (behind features.partners).
- Filter button top-right: categories, saved/unsaved.
- Max 20 purple pins around the area the user is looking at, reloading as they move. Cluster into numbered circles when zoomed out. Saved bookmarks always show.
- Tap a marker to open the Place page. Commit.

APP · Step 10 · Profile

COPY INTO CLAUDE CODE

Move everything from the old menu into Profile: Settings, Help (WhatsApp +971508733160), About, Privacy, Delete all my data. Add "Places you've been": a list of saved places the user marked with an "I went" button on the Place page. Add placeholder cards behind switches for later: Pins per place, money saved, offers used. Commit.

LATER (~June 2027) · Spotted Together

> **Needs:** Supabase (free) for shared data + **real login with a free email code**. Ask Claude Code to set that up first, then:

COPY INTO CLAUDE CODE

Build Spotted Together behind features.together:
- List of groups and one-to-one plans (same list), "+" for New group / New plan, back arrow to Home. Badge "N updates" (new polls, votes, notes).
- Invite by WhatsApp link only; friends must install Spotted. Max 45 per group. Anyone can leave; the creator can remove people.
- No chat. A plan has a saved place (or a vote between places showing stars and influencer counts) and polls: date/day, time we leave, overnight yes/no, and for parks/farmhouses/staycations "bring an item or order food there" with a tick list so nobody brings the same thing.
- One note per person. Anyone can start a poll. Polls close at a set time; the creator breaks a tie.

LATER (Jan 2028) · New tab with puzzle tiles

COPY INTO CLAUDE CODE

Behind features.newTab: a New tab with 4 interlocking puzzle-piece tiles: Spotted Insider, Spotted Partners, Spotted Offers, Spotted Select (coming soon). Tapping a tile expands it to fill the screen, then shows that list. Spotted Together sits at the top. Red dot on the tab when something new arrives.

WEBSITE · changes to make

Open **claude.ai/code**, choose **Spotted-website**, and paste:

COPY INTO CLAUDE CODE

Update the site to match these decisions:
- Influencers page: rename to "Spotted Insider". Insider is paid only, AED 249/month, 2 months free. Non-paying influencers just get "Saved from @you" credit in the app. Only Insiders get a profile picture, all reels shown, stars and a dashboard.
- What's Spotted page: add "Saves from any country" (switch country in Saved), "Offers from reels, with a reminder before they end", "Map: red = your saves", and a "Spotted Together, coming 2027" teaser (plan outings with family and friends: polls, no chat).
- Spotted Select: a small "Coming soon" mention only.
- Restaurants page pitch: before partnering, a place shows only a letters circle and the reels each user saved; partners get a purple page, menu, reviews, all Insider reels and stars.
- Influencer dashboard: add a "Check your prices" prompt when a dish price is old or doesn't match another reel.
- No faces, people or animals in any image or avatar.

Commit and give me the preview link.

Honest checks

- **Time:** Steps 3–10 are a lot before 1 Jan, on top of store testing. If November gets tight, do **3, 4, 6 and 9 first**. Avatars and "Places you've been" can come in an update in February.
- **Captions:** many reels don't mention the place, dates or prices. The confirm step is what keeps saves correct. Never skip it.
- **Google photos and logos:** not used, because of copyright, cost and faces. Partners upload their own.
- **Still open:** should the avatar on Home open Spotted Together (as now) or Profile?
